DATABASES

Practice : Communicating with MySQL-Server using any client

Creating database and importing data

Connecting to database and importing data.

1. Launch any MySQL client of choice.

2. Connect to your local MySQL server.

3. If you don't have the database "sante" with its data, import it from the sante.sql dump file given to you.

Creating database and importing data

Connecting to database and importing data.

1. Select only the name of department for all departments

2. Select all the departments in the region 'Occitanie'

3. Select all departments of the region 'Bretagne' or 'Corse'

4. Select all departments containing "oir" in their name

5. Select all departments having region names containing "la"

6. Select the first ten departments
